

SERVICE-DISABLED VETERAN-OWNED SMALL BUSINESS

Secure AI, intelligent automation, and systems integration — built around the systems you already run. Principal-led, security-first, no rip-and-replace.

CORE COMPETENCIES

Secure AI implementation

Responsible, well-scoped AI — drafting, summarization, retrieval, decision support — with private-data boundaries and human approval on consequential actions.

Intelligent automation

Monitored, reversible automations for repetitive operational work, each with a clear owner, an audit trail, and a manual override.

Systems integration & data unification

Secure APIs, event syncs, and shared data models so a record entered once appears everywhere it is needed.

Custom software

Purpose-built internal tools, portals, and decision-support dashboards — secured from the first commit.

Security architecture & readiness

Baselines informed by NIST CSF 2.0, Zero Trust, and OWASP; SOC 2 readiness support (readiness, not certification).

DIFFERENTIATORS

- SDVOSB, principal-led by a founder trained in both AI and cybersecurity.
- Precise, audit-safe claims: NIST-aligned, not certified; SOC 2 readiness support, not compliant.
- No licenses, no vendor commissions, no lock-in — every deliverable documented and handover-ready.
- Security as a property of every engagement, not a phase bolted on at the end.
- A working pilot in production by week six — judged on shipped software, not slideware.

COMPANY DATA

BUSINESS TYPE

Service-Disabled Veteran-Owned Small Business (SDVOSB)

LEADERSHIP

Jacob Bevier, Founder & Principal — U.S. Army veteran; M1A2 SEP v3 Abrams Master Gunner

CREDENTIALS

MS Artificial Intelligence · BS Cybersecurity (Magna Cum Laude) · CompTIA Security+ · AWS Certified AI Practitioner

FRAMEWORKS

NIST CSF 2.0 · Zero Trust · OWASP · SOC 2 readiness support
